

NFTs2Me <> Canto

Online Hackathon 1-5

NFTs2Me - Empowering NFT creators on Canto

- **What is NFTs2Me?**

[NFTs2Me](#) is a user-friendly comprehensive platform to create, deploy and manage your NFT collection and community, **100% free** with advanced functionalities.

It embraces the three big pillars of the NFT life cycle: **creation, deployment, and administration** of the contract and the **community**, empowering NFT creators.

What makes NFTs2Me different?

- Anypayments & ERC-20 mintings
- Collections as NFTs (Ownership)
- Different Minting Types
- On-chain affiliation
- Token Gating
- Custom Minting pages with free subdomain
- And much more!
 - Free IPFS-hosting, soulbound tokens, NFT holder snapshots, automatic logo and banner generation, split revenue, PSD support, airdrops with CSV batch sending, whitelisting, decentralized Governance and on-chain voting support, very gas efficient deployments...

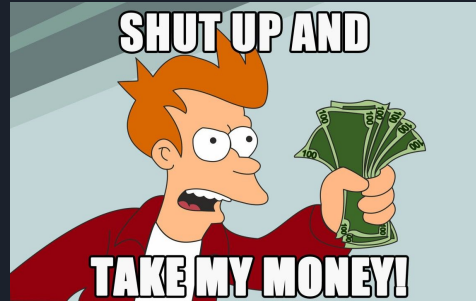

NFTs2Me ❤️ Canto

- **Contract Secured Revenue (CSR) for the creators**
 - When creating an NFT collection, the collection contract registers on the CSR Turnstile to generate an NFT for the collection owner. Instead of keeping for us, **100% of the accrued revenue with go to the owner.**
- **Native \$NOTE support**
 - Set the minting price on CANTO? Or maybe something more stable like \$NOTE?
 - Not all NFT all born the same way. Some utility NFTs must have a fixed price that doesn't fluctuate as native coins usually do. Setting the minting price in \$NOTE will give them a powerful tool.
- **Seamless Canto DEX integration**
 - With our Anypayment feature the user can pay on native coin even if the collection minting price is set on an ERC-20 like the \$NOTE stablecoin. We've done that using the Canto's DEX underneath in a seamless and transparent way for the user.

Say no more, I wanna see it!

Sustainability - The Future of NFTs2Me (I)

- Just launched on mainnet! [TWEET](#)
- We listen the community.
- Received several Canto's community requests, some implemented during the Hackathon:
 - Animated Art (GIFs) as layers for NFT generation. [TWEET](#)
 - Max Per Address limit.
 - Drop and End Date. [TWEET](#)
- Thrilled to continue listening to the community!

Sustainability - The Future of NFTs2Me (II)

- What will we do with the prize?
 - Reinvest on Canto!
 - We'll invest a big part of the prize to promote the creation of NFT utility collections within the Canto ecosystem using our tool, through:
 - Competitions
 - Direct rewards
 - Raffles among creators
 - Giving away our utility token (Booster Pack)

Thank you!
